URBAN LIGHTING – DESIGN & MASTERPLANNING

Hoare Lea Lighting is an independent Lighting Design Consultancy. Its Principal, Dominic Meyrick, M.Sc., has shown a long-term commitment to CPD and HLL was the first consultancy to become a CPD Network Provider for the RIBA.

Under the umbrella title **LIGHT AS AN ARCHITECTURAL TOOL**, there are 5 individual topics covering cutting-edge lighting design issues, each of which takes one hour. Dominic is passionate about his subject and his lively, effective delivery makes learning fun.

LIGHT AS AN ARCHITECTURAL TOOL

- 01 THE BUILDING BLOCKS OF LIGHT
- 02 LIGHTING FOR THE ELECTRONIC AGE
- 03 LIGHTING FOR RETAIL THERAPY
- 04 AFTER DARK – LIGHT AND THE NIGHTSCAPE
- 05 LIGHT AND THE FEEL-WELL FACTOR

Dominic Meyrick will discuss how lighting can transform interiors and attract and engage people. Depending on how a space is lit, this engagement can be subtle or dynamic, passive or interactive, conscious or subconscious. It's about understanding:

Horses for Courses - define the **task**

Fun or Run? The **time** factor

Now See Here - or There, or Everywhere?

Space Control. Come **here**, go **there**!

Human **response** to the Lit Environment

All these factors will play their part in creating a 'designer' solution
